

## ALCOHOL OPERATIONS RESEARCH INTERNSHIP

The [Vermont Department of Liquor and Lottery \(DLL\)](#) seeks a motivated, tech-friendly intern to conduct two alcohol operations research projects. The first task is an evaluation of liquor prices in states that use a [Control State Model](#) vs prices in states that utilize a license model. The goal is to prepare this information ahead of next year's legislative session. Due to the daily fluctuation of liquor prices, this portion of the internship should be completed within approximately 1 month. The second task is an evaluation of how all other states manage their liquor boards and commissions. The goal is to better understand the models by which they establish their alcohol beverage commissions (ABCs) and the duties and responsibilities of each group.

This internship is ideal for candidates majoring in Supply Chain Management, Business Administration, Business Analytics, or other related fields. Proficiency in Microsoft Word and Excel required.

The Department of Liquor and Lottery is located in Barre, VT. Remote, hybrid, and in-person options are available.

**This position is paid**, and our intern will receive a three-part stipend. \$1,004 will be awarded after 30, 60, and 90 days. Total compensation is \$3,012 for the duration of the internship. This amount is based on up to 20 hours a week for 12 weeks at Vermont's minimum wage rate.

Tentative Timeline:

2-hour orientation – August 29th – Explanation of Control vs License models, project expectations, and Excel sheet walk-through

1-hour weekly check-ins for the remaining 11 weeks

30 Day Status Update – Goal: Completed liquor pricing spreadsheet (First Task)

60 Day Status Update – Goal: Halfway point for Alcohol Beverage Control project (Second Task)

90 Day Status Update – Goal: Completion of both tasks

To apply, please send your resume to [Jacqueline.Posley@vermont.gov](mailto:Jacqueline.Posley@vermont.gov) or apply on [Handshake](#).
